Subject: RE: New Guidance on RAD fate, eco, health language for determination Documents

Hi Ex. 6 Personal Privacy (PP)

I think this is the way that I'm supposed to do this. I am ready to write the DD - NL Ex. 6 Personal Privacy (PP) for P-18-0286. Could you alert RAD to notify me when all of the reports are complete.

Thanks,
Ex. 6 Personal Privacy (PP)

Hi Ex. 6 Personal Privacy (PP)

This will have a significant negative impact on the goal of closing 40 cases each month. The reason why we started to write the DD language was precisely because RAD was not able to keep up with the speed and volume of work. I understand and share your concern, Ex. 6 Personal Privacy (PP). This is what we have been directed to do by Ex. 6 Personal Privacy (PP). I expect that there may be a delay until RAD can staff up folks for the New Chemical work.

My questions are: About the DDs that we already have in CCD QA/QC folder. Do I need to notify RAD about those cases or are they notified by you with the priority every two weeks? RAD has been and will continue to be notified by me; you

do not need to notify them. For new cases going to option meeting, Do I notify RAD or Do I send you the request to you to set the priorities? Send it to me for now.

Subject: New Guidance on RAD fate, eco, health language for determination Documents

To All,

Until otherwise notified, [REDACTED] has directed that CCD Program Managers should use in Determination Documents only the fate, eco, and health language that RAD develops and sends to CCD. Furthermore, we have been directed to cut-and-paste RAD's fate, eco, and health language into Determination Documents without making any edits to the language. CCD Program Managers and CCD QC reviewers of draft Determination Documents are not to draft the fate, eco, or health language ourselves.

[REDACTED] I met with RAD folks ([REDACTED]) yesterday to discuss this directive and related issues. We agreed that, for all of the FY2019, "hair on fire," and Pre-FY2019 cases that will be designated as "priority" cases each month, RAD will check previous RAD fate, eco, and health language and will update that language, if needed. RAD will notify CCD when the updated language, if needed, has been developed; the mechanism of this notification is still being finalized but should be done by early next week.

1. Because all determination documents must now use only RAD's fate, eco, and health language, if you're working on a determination document, you'll need to wait until you have confirmation from RAD that the language is ready before you finish drafting the determination document and submit it to the CCD QC review queue.
2. Determinations that are already in the CCD QC queue must also use only RAD's fate, eco, and health language. For any determinations of yours that are already in the queue, when you have confirmation from RAD that the language is ready, include the updated language in your determination document and then alert [REDACTED] that it's ready for QC.

- Exception: cases in the SNUR batch 19-2b (i.e., the next batch of SNUR-based Not Likely Determinations) – most of these determinations have already been QC'd in NCMB and have been reviewed by CCD IO. RAD will review these determinations documents directly to determine if they need any revisions for consistency with their current templates.

If you have a question/concern about fate, eco, or health language after RAD has confirmed that it's ready, contact RAD directly on the CBI side and CC me (i.e., [redacted] Ex. 6 Personal Privacy (PP) fate), [redacted] Ex. 6 Personal Privacy (PP) eco), [redacted] Ex. 6 Personal Privacy (PP) health), and [redacted] (health).

If RAD subsequently makes additional changes to fate, eco, or health reports – after they already have notified you that they are complete – then RAD will alert the program manager that additional changes were made.
